

# Integral Venetian Blinds

## Senator Windows is pleased to announce the addition of Integral Venetian Blinds to its range of products

Combining modern technology and traditional style, Senator's Integral Venetian Blinds are designed for a wide range of applications and are ideally suited for use in homes, offices, hotels, hospitals and schools. A reliable and cost-effective means of controlling light and glare, their decorative design and finish are capable of delivering performance whilst reflecting the needs of architectural and interior design trends.

Integral window and door blinds are sealed within an airtight environment, immune to dust, moisture and abuse. They are easy to operate by a simple magnetic slider that allows for maximum light, shading or complete privacy as required. By controlling the diffusion of natural light, blinds help to reduce the effect of bright sunlight, yet allow natural light and heat in, thus improving a room's year-round functionality and avoiding an over-reliance on air conditioning or artificial light.

Integral Blinds are an ideal solution for windows, internal vision panels and

doors. They are easy to operate with no compromise on safety or hygiene. Safety and cleanliness are critical elements in any home or commercial environment. Besides being safe, cordless blinds often provide a sleek look, since you don't have cords that may hang down or tangle. With no hanging cords or exposed slats to attract dust, they stay clean, are fully controllable and, critically, cannot be damaged.

In the last couple of years there has been a push to make window blinds safer for young children. Integral Venetian Blinds eliminate the safety concerns surrounding window blinds because they eliminate the cords that cause most of the concern. With no cords to play with you can install Venetian Blinds in your children's room without worrying about their safety. No cords = no worry!

Classic whites and creams along with contemporary silvers and greys all feature in our selection of 18 shades and can be manufactured to suit your individual window and door requirements and to

complement your interior décor. Integral blinds do not interfere with the operation of windows, sliding patio or bi-folding doors and are great for more awkward windows, for example tilt-and-turn or skylight windows.

At Senator each unique Venetian Blind is individually crafted to meet our rigorous quality standards and all the materials used in the manufacture of the blinds are specially selected for their quality, strength and durability to enhance the appearance and life of your blind. The blinds are custom made and can be encapsulated into all our Senator Energy Efficient **Senergy+** double-glazed units.

Senator's Integral Venetian Blinds are safe, hygienic, energy-efficient and unobtrusive. For a no-obligation quotation please call one of our representatives today.

NO COMPROMISE WITH  
SAFETY OR HYGIENE
