Decorative horn

Optional Georgian bar available as face fixed or glazed-in

Custom made to suit every home

Senator Vertical Sliding Sash Windows

Senator's Vertical Sliding Sash window provides a truly long-term, cost-effective solution for period style properties. Designed by Senator Windows to provide all the benefits that can be derived from modern high-performance materials, the advanced technology works in harmony with traditional design to provide extra comfort and practical features for modern living without compromising character or appearance.

All Senator Vertical Sliding Sash Windows incorporate energy-efficient 24mm double glazed units with a window U value of 1.5 and are "A" rated as standard to help save you money on your heating bills.

The PVC window frames provide optimum strength, superior thermal properties and excellent weathering performance and will retain their pristine appearance year after year.

Security

Your home is your castle and the place where you keep your most treasured possessions. Choosing the right frames and hardware for your windows and doors will increase the security of your home, without compromising on style.

Safety and security are of prime importance to us and you can rest assured that your Senator Window comes with the highest quality security features. Senator Vertical Sliding Sash Windows are all fitted with hardware and locking options that have been proven to meet the latest performance requirements of the Industry.

Energy Efficiency

Our homes and buildings are responsible for almost half of Ireland's carbon dioxide (CO₂) emissions. Over 25% of the heat escaping from an average home is lost through its windows and doors. * You can shrink your carbon footprint and lower your fuel bills by choosing Senator's energy-efficient window system to reduce the amount of heat lost through your windows.

The Senator Vertical Sliding Sash Window system consistently achieves high energy-ratings by using multiple chambers to lock in the heat, and high-performance seals to ensure that there are no gaps for heat to escape.

* Source of data: SEAI.

Performance & Maintenance

Excellent weathering performance is guaranteed. Our windows are subjected to continual testing for wind resistance, air permeability and water tightness, so you can be sure you will be protected from the elements no matter what the weather.

Years of engineering experience means that you can have total confidence in the durability and longevity of our window frames. And maintenance couldn't be easier, a damp, soft cloth is all it takes to clean a PVC frame – no more painting every two to three years.

The Senator Vertical Sliding Sash Window provides a blend of advanced technology with the craftsmanship of old.

Reasons to choose Senator

1. Quality

All our products undergo rigorous tests to ensure that they are of the highest quality, durability and reliability.

2. Energy efficiency

With ever-increasing energy costs and growing environmental concerns, our windows have been designed to make the most efficient use of materials. Our Vertical Sliding Sash Windows are certified by the BFRC.

3. Security

Our Vertical Sliding Sash Window range has been independently tested for security performance. They have corrosion-resistant high-security fittings for complete peace of mind and are internally glazed for maximum security.

4. Guarantee

All of the windows in our Sliding Sash range come with our extensive 15-year guarantee.

5. Choice of styles, colours, finishes

The Senator Design team can create any style or finish of window to meet your specific requirements.

6. Insulation

Great heat - and sound insulation, which allows real and tangible savings of energy costs combined with a high comfort level.

Hardware & Fittings

Colour Options

You can choose exactly the look you want from a great range of colours. Whatever the location and style of your property, there is a colour and finish to match it. Choose from a range of White, Cream, Rosewood, Bog Oak or Classic Oak finishes.

The Senator Vertical Sliding Sash Window contains a variety of top quality hardware including balances, pivot bars and locking mechanisms. One of the special features of these windows is the Senator Constant Force Spiral Balance System. This lets you open and close the window with ease, plus it allows both sashes to tilt-in for easy cleaning.

From the quality of the PVC frames to the high-spec security and energy saving glass units, you can be assured that there is no better window for your home. You know you are in safe hands with Senator Windows.
