Energy Efficiency

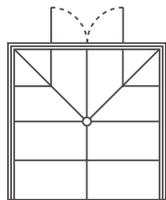

All Senator Products consistently achieve high energy-ratings by using multiple chambers to lock in the heat, and high-performance seals to ensure that there are no gaps for heat to escape. *Source of data: SEAI

Security

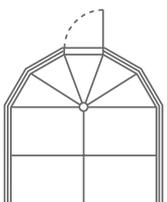

Senator's windows and doors are all fitted with our high-security Shootbolt locking mechanisms, which have been proven to exceed the latest performance requirements of the Industry.

ONLINE EDITION 2018

Extended Living

Conservatories, Sunrooms & Orangeries

Conservatories & Sunrooms

Today conservatories can be tailor-made to match individual tastes and requirements no matter how complex the site, making the customised conservatory more popular than ever.

The completed project should complement your home and care is taken to make your conservatory appear as though it has always been part of the original house.

A conservatory is more than an extension to your home; from the onset, a conservatory is designed to bring pleasure as an extension to your lifestyle for all seasons, where home and garden can become one.

Styles

- Victorian
- Edwardian
- Georgian
- Lean-to
- Bespoke

With so many designs and finishes available for you to choose from, your new conservatory or sunroom can be as individual as you are.

Options

Glass Styles & Designs

Double-glazed and triple-glazed options available - including leaded and Georgian.

Solid roof options available.

See our specifications page in this brochure for further options. If you have something special in mind; why not talk to one of our sales consultants?

Your Conservatory...
a window to the world.

Orangeries

An Orangery can be used in all seasons, as the flat roof area is fully insulated to keep heat in, and our designers will recommend the correct Low E glazing in the roof-light, windows and doors, to make your new Orangery more comfortable.

A modern Orangery can be designed with sliding, French and bi-fold doors.

Whether you choose PVC or Aluminium, Senator Windows will help you design and select the correct material to enhance your home.

With the correct design guidance, we can make your new Orangery look more like an extension to your home, with greater brick-built elements than a typical conservatory, and more windows than your traditional extension.

This product is unique as it is Senator's own thermally broken design and has a completely different appearance than the non-thermal T-bar conservatory systems currently available in the market.

Extended Living

Extended Living spaces are becoming increasingly popular for many reasons. People are choosing to create backyard retreats where they can relax, entertain, and spend time with their family and friends.

Extended Living offers you the customer various options for opening your home into your garden. We have a full range of products available to help you achieve this:

- **PVC and Aluminium Windows**
- **Patio, French and Bi-Fold doors**

All available in a variety of colours, glazing options and materials, please consult our specifications page for the full range of options.

We can offer technical and design support from our dedicated team to help you achieve your new living space.

Imagine a new opening to the outside world
