WELCOME TO A BRIGHTER HOME

Windows and doors are more than functional ways of letting light and people in to your house. They give personality to the exterior of your home, while framing your view of the world outside. Whether it's the colour, style, fittings or openings, your windows and doors are unique to your home.

Choose your ideal combination of styles and features and you can look forward to years of lasting, low maintenance elegance. Every time you return home you'll get that feeling of light and cosiness, knowing you have a warmer home and increased energy efficiency. And there's a lot to consider, from colours and styles to fixtures and openings, glazing and accessories. We've created this brochure to give you a starting point. Take time to compare, explore and be inspired and if there's anything else you want to ask, our Senator representatives are there to help.

SEAI GRANT SUPPORT

SEAI stand-alone window and door grants are now available for eligible homeowners, making it the ideal time to become more energy efficient and upgrade your outdated windows and doors. You'll find our grants guide on senatorwindows.ie or by scanning the QR code below.

> Take your time to compare, explore and be inspired.

TOP TIPS

Expert hints and advice from award-winning architect and interior designer Denise O'Connor

Throughout this brochure, Senator's expert design consultant Denise O'Connor gives her professional insights, ideas and tips, so you'll know what to look for when choosing the ideal uPVC windows and doors for your home.

Senator Windows
State-of-the-art manufacturing facility in Wexford

YOU'RE IN GOOD HANDS

With Senator making your windows and doors, you couldn't be in better hands. We've been a leading provider of quality, stylish, bespoke windows and doors since 1985. Attention to detail, insistence on quality raw materials and commitment to service have kept Senator at the forefront of the Irish window and door industry. We take great pride in the design, innovation and craftsmanship that go into everything we make at our state-of-the-art manufacturing facility in Wexford.

Wherever you go in Ireland you'll find yourself looking through our windows, whether you're on an exposed coastline, a windswept hillside or in the heart of a noisy city. All of our uPVC windows and doors carry a 15 year guarantee* and we often hear from customers whose Senator products have kept them dry, warm and cosy well beyond that. Senator windows and doors are energy efficient, elegant, secure and affordable – and with our legendary durability and an excellent guarantee, you're looking at a bright and cosy future.

Today, Senator Windows is a member of the dynamic Gowan Group, giving us the resources and support to ensure we continue to set and raise standards on safety, insulation, durability and style.

* For 15 year guarantee information and full guarantee terms and conditions please contact your local dealer. Some exclusions apply.

WHAT OUR CUSTOMERS SAY...

"From the outset we had our hearts set on a certain style of window for our home. We made contact with a few home owners who had similar styles to the windows we were interested in and Senator Windows kept being mentioned."

Eadaoin Roche
Senator Windows customer

CREATING THE PERFECT HOME IS A JOURNEY AND WE'RE WITH YOU EVERY STEP OF THE WAY

Few of us will purchase windows and doors more than once or twice in our lives, that's why it's important to work with experts who have helped thousands of other people create their perfect home. Senator's nationwide network of dealers and sales representatives is there to guide and advise you, with expert advice on styling, accessories and installation.

Every house is unique and every family's needs are different so, whether you're replacing or building from scratch, your Senator Windows and Doors are custom made for you. Your sales representative will help you choose the right combination of features, colours, styles and accessories, to turn your vision for your home into a reality. Why not experience the Senator uPVC window and door range first hand? You'll find your nearest Senator Windows showroom at senatorwindows.ie.

DISCOVER THE BENEFITS OF SENATOR uPVC WINDOWS AND DOORS

uPVC has a great many advantages over other materials used for manufacturing windows and doors, making it an ideal choice for both contemporary and traditional homes. Here are some key benefits to consider when choosing uPVC for your home:

1. THE AFFORDABILITY

uPVC windows and doors are economical to install as they cost less than equivalent alternatives. The Senator range of uPVC windows and doors has excellent U-values but the real benefit comes from the ongoing, year-round, energy savings and comfort they provide, far into the future.

2. THE LONG LASTING FINISH

uPVC's durability means it requires little maintenance. Its elegant finish lasts and lasts, with just an occasional wipe with warm, soapy water. All of our windows and doors carry a 15 year guarantee*, so you can be confident that you're investing in products that will improve your home for many years to come.

3. THE HEAT AND SOUND INSULTATION

With energy costs and the environment top of mind, Senator Windows and Doors are designed to make maximum use of the most thermally efficient materials. In addition to quality uPVC frames, double and triple-glazing panes contain gas barriers to prevent heat loss, with warm-edge spacer bars and Low-E/Low-Iron glass further contributing to heat retention. Senator energy efficient products can reduce energy costs and can make your home a nicer place to live and entertain.

4. THE SECURITY

Senator uPVC Windows and Doors are designed with security in mind, as well as energy conservation. High security locking mechanisms and internal beading prevent intruders from removing glass from the outside. There is also a range of optional extras available to further enhance the security of your chosen windows and doors to give you complete peace of mind.

5. THE LOOK

Available in both smooth and authentic woodgrain finishes, there is a choice of up to 26 colours, giving you plenty of options to suit your home and your taste. And, as every Senator Window and Door is made to order, we can create a style and finish to meet your specific requirements.

6. THE VERSATILITY

Senator uPVC products can be installed in any home - old or new, traditional or modern, new-build or replacement. Over the following pages you will see the wide range of product styles and optional extras available for you to create your ideal windows and doors.

TOP TIPS

From our expert design consultant, Denise O'Connor

uPVC windows and doors not only offer practical benefits but also contribute to the aesthetic appeal of your home. With lots of styles and finishes to choose from, they can complement any architectural style, from traditional to modern. uPVC windows and doors can be customised, allowing you to choose the perfect shape, size, and colour to match your personal preferences and the overall design of your home. With their low-maintenance and durable properties, uPVC windows and doors are functional and add an element of elegance to your home's design.

BE INSPIRED

At Senator Windows, beautiful homes inspire us and we inspire beautiful homes. The extensive choice of colours and finishes available across Senator's uPVC ranges means you can create your windows and doors your way, using any combination you want. And, because we make every window and door to your exact specifications, we can create any shape or angle you want, whether you're replacing your existing windows, building an extension or building from scratch. To help inspire you, we've spoken to three Senator customers who have used Senator windows and doors to make their dreams come true – and want to show you how they did it.

WHAT OUR CUSTOMERS SAY...

“My top tip for others looking for windows and doors, is to research different materials, uPVC and aluminium, to fit your style of windows.”

Laura Cullen
Senator Windows customer

THE BEST OF BOTH WORLDS

A newly built family home, with uPVC and aluminium working perfectly together.

Building their new home from scratch meant that Robert and Laura Cullen didn't have to compromise on anything. Although Robert is an architect and deals with all stages of house construction, from design stage to completion, this was their first home build which meant it was their first time dealing with a window manufacturing company together. They wanted the maximum amount of natural light, with the best insulation and fuel economy possible. They chose Senator uPVC for the residential doors and the casement windows around the house. However, when it came to a particularly large window and the bi-fold patio doors, their Senator representative recommended the additional structural strength of aluminium. The combination of uPVC and aluminium gives them the best of both worlds. All the windows are triple-glazed, the uPVC in 7016 Smooth Grey matches the Anthracite Grey RAL 7016 aluminium, with satin-finish hardware throughout. For further information on Senator doors and windows, talk to your Senator Windows representative. Find your nearest Senator dealer on senatorwindows.ie.

> "This home combines the convenience and durability of uPVC with the structural strength of aluminium for the extra-large window and bi-fold doors. The 7016 Smooth Grey uPVC works beautifully with the Anthracite Grey RAL 7016 aluminium."

INSPIRATION

LIGHT THAT DELIGHTS

A dormer bungalow showcases a wide variety of uPVC styles and applications.

The owners of this distinctive dormer bungalow wanted to maximise the availability of natural light throughout their home. The layout of the house meant using a variety of Senator uPVC window and door types, including: Casement Windows, French Doors, Residential Doors and Tilt & Turn Windows, each made specifically for the space required.

They chose 7016 Grey for the exterior, in keeping with the slate roof, while inside they went for cream woodgrain for maximum light and to complement the interior décor. They opted for French Doors at the south-facing front entrance, incorporating integrated blinds for privacy. In contrast, they used smaller windows along the north-facing rear. A special feature in this home is a tall window facing the stairs, which lets light flood into the landing and the hallway. For additional safety, the lower panes are made with toughened glass.
By choosing Senator Tilt & Turn Windows throughout their home these customers achieved sleek lines with full panes of uninterrupted glass, while still allowing for an opening through the tilt function.

Customer's Top Tip: If you're putting blinds on a window, be sure to check that the reveals are wide enough. Is there enough space over the window to let you open it without catching the blind?

RENOVATION WITHOUT COMPROMISE

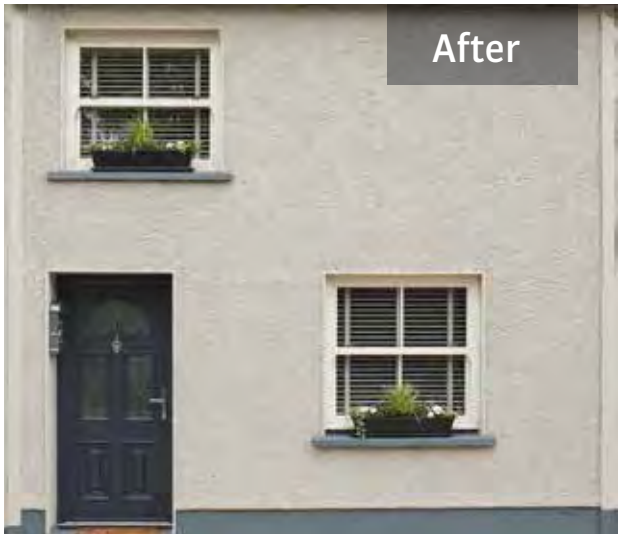
Authentic period features, with contemporary style and comfort.

Rachel and Tadhg D'Arcy's plan was, where possible, to restore the original style and features of the town house, while incorporating the benefits of modern innovation.

They chose Senator uPVC Vertical Sliding Sash Windows, in Cream, for the original house and downstairs extension. For the upstairs extension they opted for uPVC Casement Windows, with 7016 Grey exteriors and white interiors. For the hardware and fixtures they selected chrome throughout.

As well as being compatible with the house, they felt vertical opening windows were more suitable for a house that opens directly onto the street. Their favourite feature is the L-shaped back corner sash, which incorporates a window seat. It frames their view of the garden beautifully, allowing them to keep an eye on their little girl.

For the front door they chose a Senator Cahir 2 Sentinel Composite Door, in Anthracite Grey 7016. You'll find more on Senator's Sentinel Door range at senatorwindows.ie.



WHAT OUR CUSTOMERS SAY...

"Through our work we encounter all the window suppliers and their products. We have consistently noticed the quality and high standard of Senator Windows' installations, compared to the rest."

Rachel D'Arcy
Senator Windows customer

"

Best advice? They are very grateful to their Senator representative who suggested Georgian style bars in the Residential Back Door, to complement those in the back corner sash.

"

uPVC Casement Window
Colour: Cream
Hardware: Gold Handle

CASEMENT WINDOWS

Senator uPVC Casement Windows are the most secure, elegant and energy efficient on the market. You'll find the versatility and range of colours you need to help make your vision a reality, whatever type of home you live in. Superior design, state-of-the-art insulation, and the highest quality materials, give Senator Casement Windows optimum strength, excellent thermal properties, classic style and a pristine, long-lasting finish.

WAYS TO CUSTOMISE YOUR CASEMENT WINDOWS:

- Opt for integrated, maintenance-free blinds. *(See page 56)*
- Easy-Clean Egress Hinges give access to external side of panes, for cleaning. *(See page 54)*
- A Child-Proof Safety Catch lets windows open enough for ventilation only. *(See page 54)*
- A Shootbolt Locking Mechanism for additional security and peace of mind. *(See page 55)*

Do you have any specific requirements? Talk to your Senator dealer. Your windows are made to order, for your home and your needs.

APPEARANCE

Ovolo bead profile with elegant, slimline frames.

ENERGY

"A" rated as standard, with overall U-value from 0.8 W/m²K to 1.3 W/m²K, thanks to a thermally efficient, six chamber 70mm profile and high performance seals which reduce heat loss.

GLAZING

28mm double-glazing is standard. This can be upgraded to 28mm, 36mm or 40mm triple-glazing.

OPENING STYLE

Wide selection of styles available, including open out, top or side hung. Different configurations including bow/bay windows and customised features such as angles and arches.

COLOUR

Frames are available in a choice of 26 colours, with the option of dual colour, e.g., one colour external, another internal (See page 38). Handles are available in five colour options. (See page 53)

SECURITY

High security locking mechanisms, fittings and materials. Internally glazed for maximum security.

GUARANTEE

Your Senator uPVC Casement Windows are backed by a 15-year guarantee*.

TOP TIPS

From our expert design consultant, Denise O'Connor

When considering how many openings to incorporate, consider how much ventilation you want and how the windows will look from your home's interior and exterior. Fixed panes are great for framing beautiful views or for areas where ventilation isn't necessary while opening windows can be placed strategically to provide cross-ventilation. It's also essential to consider sightlines and how the window frames the view. Choosing a simple frame can maximise the amount of natural light and make the most of the view.

uPVC PICTURE WINDOW
Colour: Cream

PICTURE WINDOWS

Senator's uPVC Picture Windows are fixed, non-opening windows. The uninterrupted glass area and the absence of an opening sash allows maximum light into your home and frames the views outside like a picture, seamlessly connecting indoor and outdoor spaces. And like all windows in Senator's uPVC range, they are elegant, secure and energy-efficient. The finest materials and superior design mean Senator Picture Windows provide superior thermal properties, optimum strength and great looks. It also means excellent weathering performance, so your windows will keep their pristine appearance for many years to come.

CUSTOMISING OPTIONS:

• Opt for integrated, maintenance-free blinds. (See page 56)

Your Senator sales representative is there to help you choose the ideal styles, finishes and features for your home.

APPEARANCE

Ovolo bead profile with elegant frames.

ENERGY

Thermally efficient, six chamber profile and high-performance seals reduce heat loss. 'A' rated as standard, with overall U-values as low as 0.8 W/m²K.

GLAZING

Standard 28mm double-glazing, can be upgraded to 36mm or 40mm triple-glazing.

OPENING STYLE

Picture windows are fixed, meaning they don't open.

COLOUR

Senator Picture Windows are available in a choice of 26 colours, with the option to have different colours inside and outside (see page 38).

SECURITY

Internally glazed for maximum security.

GUARANTEE

All Senator Windows are backed by a 15 year guarantee*.

PASSIVE & HIGH PERFORMANCE WINDOWS

With high costs and stricter legislation, everyone has to consider the energy efficiency of their home. More and more people are choosing homes designed to the 'Passive House' standard, with excellent thermal performance, exceptional airtightness and minimum energy consumption.

While thermally efficient and airtight construction materials are key to energy efficiency, windows play a vital role in helping buildings comply with NZEB regulations (Nearly Zero Energy Buildings). And it's not just new buildings, retrofitted homes can also meet NZEB standards, with greater energy efficiency, year-round comfort, better air quality and lower energy bills.

Senator uPVC Passive & High Performance Casement Windows are crafted using the EnergyPlus90 window system, one of few window systems to comply with the exacting 'Passive House' standards. Unlike other systems which rely on messy, time-consuming foam-filled cavities, EnergyPlus90's unique 9-chamber profile is designed to meet the triple challenges of thermal efficiency, noise reduction and security. Testing has resulted in EnergyPlus90 joining the ranks of the select few window products to claim Passive House certification - Component id: 1014wi03 & 1015fx03.

APPEARANCE

Efficiency but not at the expense of elegance. Slim sightlines, chamfered frame with sculptured bead as standard. Chamfered bead available as an option.

ENERGY

Thermal efficiency is achieved through a nine chamber, 90mm profile and high-performance seals. Triple-glazed uPVC window achieves U-values as low as 0.71 W/m²K.

GLAZING

Most uPVC window systems are limited to 40mm glazing options. EnergyPlus90 offers triple-glazing as standard, in a choice of 48mm and 56mm. Passive House compliant with laminate glazing included.

OPENING STYLE

Available in a wide selection of window styles, including open out, top or side hung openers.

YOU CAN CUSTOMISE YOUR PASSIVE & HIGH PERFORMANCE WINDOWS WITH:

- Integrated, maintenance-free blinds. *(See page 56)*
- A Child-Proof Safety Catch lets windows open enough for ventilation only. *(See page 54)*

uPVC Passive House Compliant Window Cross Section

COLOUR

Passive & High Performance Windows are available in a choice of 26 colours. And you can mix and match, with one colour on the outside and another on the inside (see page 38). Your Senator representative will be able to advise you of the various combinations available. Handle colour options are shown on page 53.

SECURITY

All locking mechanisms, fittings and materials are designed for high security, and windows are internally glazed for further security.

GUARANTEE

All Senator Windows are backed by a 15 year guarantee*.

EnergyPlus90 can be used in numerous glazing combinations, suitable for every type of installation.

SAMPLE GLAZING OPTIONS:

Profile	Glazing	Locking System	Glass	Gas	Glazing	Overall U-Value	Solar Gain
Passive House Compliant Windows							
9 chamber 90mm	Triple	Espag Security Locking	6.8 Lam/Low-E	Argon	56mm	0.73	0.57

uPVC FRENCH WINDOW
Colour: Cream
Hardware: Chrome Handle

FRENCH WINDOWS

We believe a window should strike a balance between looking stylish and elegant in its own right, while still allowing the view to be the focus of attention. Senator uPVC French Windows offer a combination of style, convenience and durability. With your choice of colour, finish and fittings, your Senator uPVC French Windows will frame your view perfectly, with many years of smooth opening and secure closing, improving the quality of your environment and making your home more comfortable.

WHY NOT CUSTOMISE YOUR SENATOR FRENCH WINDOWS?

- Opt for integrated, maintenance-free blinds. *(See page 56)*
- Easy-Clean Egress Hinges give access to external side of panes, for cleaning. *(See page 54)*
- A Child-Proof Safety Catch lets windows open enough for ventilation only. *(See page 54)*
- A Shootbolt Locking Mechanism, for additional security and peace of mind. *(See page 55)*

Do you have any specific requirements? Talk to your Senator dealer. Your windows are made to order, for your home and your needs.

APPEARANCE

Ovolo bead profile with elegant, slimline frames.

ENERGY

Senator French Windows are “A” rated as standard, with overall U-value from 0.8 W/m²K to 1.3 W/m²K. This is in part due to the thermal efficiency achieved through a six chamber, 70mm profile and high-performance seals, which reduce heat loss.

GLAZING

Senator French Windows come with 28mm double-glazing as standard. This can be upgraded to 36mm or 40mm triple-glazing.

OPENING STYLE

Outward-opening French Windows consist of an outer frame, sash and floating mullion. Different configurations and customised features are available, ask your Senator representative.

COLOUR

Senator French Windows are available in a choice of 26 colours, with the option to have different colours inside and outside (see page 38). Handle colour options are shown on page 53.

SECURITY

All locking mechanisms, fittings and materials are designed to a high level of security, and windows are internally glazed for further peace of mind.

GUARANTEE

Your Senator uPVC French Windows are backed by a 15-year guarantee*.

uPVC Tilt and Turn Window
Colour: 7016 Smooth Grey
Hardware: Satin Handle

TOP TIPS

From our expert design consultant, Denise O'Connor

Tilt & Turn windows are a versatile and stylish option for homeowners who value design and functionality. They work well in modern homes with clean lines and can also provide a unique twist in more traditional settings. One of the benefits of Tilt & Turn windows is their ability to open in two ways: tilting from the top for ventilation or turning inward for easy cleaning and maximum airflow. They are especially useful in rooms that require good air circulation, such as kitchens or bathrooms. When it comes to design features, choose a frame style to complement your home's style.

TILT & TURN WINDOWS

Discover the ease and convenience of Senator's Tilt & Turn Windows, combining the benefits of a window and a door. If you're just looking for ventilation, you turn the handle 90 degrees, which allows the sash to tilt open slightly. To open wide, turn the handle a further 90 degrees and the sash opens like a door. The tilting option allows you to enjoy the fresh air of a warm summer day, without leaving your windows wide open. Meanwhile, the fully open option makes it easy to clean the glass – inside and out. Like all Senator Windows and Doors, Tilt & Turn Windows offer excellent security and great energy efficiency, in a choice of colours, finishes and elegant designs.

CUSTOMISING OPTIONS:

- Senator Tilt & Turn Windows can be fitted with integrated, maintenance-free blinds. (See page 56)

APPEARANCE

Ovolo bead profile with elegant slimline frames.

ENERGY

Thermal efficiency is achieved through a six chamber, 70mm profile and high-performance seals which reduce heat loss. "A" rated as standard with overall U-value from 1.0 W/m²K to 1.3 W/m²K

GLAZING

Senator Tilt and Turn Windows come with 28mm double-glazing as standard. This can be upgraded to 28mm, 36mm or 40mm triple- glazing.

OPENING STYLE

Tilt and side opening for secure ventilation and ease of cleaning. The side opening function allows the window to be used as an effective fire escape. Different configurations and customised features are available.

COLOUR

Senator Tilt & Turn Windows are available in a choice of 26 colours, with the option to have different colours inside and outside (see page 38). Handle colour options are shown on page 53.

SECURITY

High security, concealed multi-point locking mechanisms, internally glazed for further security.

GUARANTEE

All Senator Windows are backed by a 15 year guarantee*.

uPVC VERTICAL SLIDING SASH WINDOW
Colour: Cream
Hardware: Gold

“

One special feature of these windows is the ‘Constant Force Spiral Balance System’, which lets you open and close the window easily, and allows both sashes to tilt-inward for easy cleaning.

”

VERTICAL SLIDING SASH WINDOWS

While Senator's Vertical Sliding Sash Windows add grace and style to any property, old or new, they are particularly attractive for period style properties, providing a truly long-term, cost-effective and compatible glazing solution. Technology works in harmony with traditional design, providing extra comfort and the practical features you expect from a modern home, without compromising on character or appearance.

APPEARANCE

Ovolo bead profile with traditional styling.

ENERGY

Thermally efficient profiles and high-performance seals reduce heat loss. A rated as standard with overall U-value as low as 1.4 W/m²K with double-glazing and as low as 1.3 W/m²K triple-glazing.

GLAZING

Senator Vertical Sliding Sash windows come with 24mm double- glazing as standard, this can be upgraded to 28mm triple-glazing.

STYLE

Vertical sashes are in the authentic, traditional style and can include period fixtures such as decorative horns and Georgian bars. Georgian bars can be applied on the outside, or sandwiched between the panes of the double glazing.

The uPVC window frames provide optimum strength, superior thermal properties and excellent weathering performance and will keep their pristine appearance for many years to come.

CUSTOMISING OPTIONS:

- Senator Vertical Sliding Sash Windows can be fitted with child-proof restrictors. (See page 55)

COLOUR

You can choose exactly the look you want from Senator's wide range of colours. Whatever the location and style of your property, there is a colour and finish to suit your Vertical Sliding Sash Windows - 17 colours in total. And you can mix and match, with one colour on the outside and another on the inside. Likewise, in some cases you can have different finishes, woodgrain on the outside and smooth white on the inside, for example, giving you more versatility and choice. Your Senator representative will be able to advise you of the various combinations available. Hardware is available in white, chrome and gold.

SECURITY

The Vertical Sliding Sash window comes with a variety of top quality components, including balances, pivot bars and locking mechanisms. They are also internally glazed for maximum security.

GUARANTEE

All Senator Windows are backed by a 15 year guarantee*.

uPVC RESIDENTIAL DOOR
Colour: Blue
Hardware: Gold Keepsafe Handle

RESIDENTIAL DOORS

External doors are the first things people see when they visit your home, so why not make a great impression with the Senator range of uPVC Residential Doors? Glazed or partially glazed, Senator uPVC Residential Doors offer the perfect combination of light, insulation, security and style - the same energy efficient profile as our windows, together with high security locking mechanisms and a strong weather seal. We guarantee the same with high security on front and back doors, so you're safe with Senator.

WHY NOT CUSTOMISE YOUR SENATOR RESIDENTIAL DOORS?

- For style and convenience, opt for integrated, maintenance-free blinds. *(See page 56)*
- Add a Safe T Catch for the ultimate in security against uninvited guests *(See page 60)*
- Convenient thumbturn locking. *(See page 60)*

APPEARANCE

Low-maintenance Ovolo bead profile, designed to match Senator's extensive range of windows.

ENERGY

Thermally efficient five chamber profile and high-performance seals prevent heat loss. They have an overall U-value of 1.1 W/m²K with triple-glazing.

GLAZING

Senator Residential Doors come with 28mm double-glazing as standard, this can be upgraded to 28mm, 36mm or 40mm triple-glazing. Decorative glass options available. (See Page 47)

OPENING STYLE

You can choose to have your Senator Residential Doors open inward or outward. There is a low-threshold option available.

COLOUR

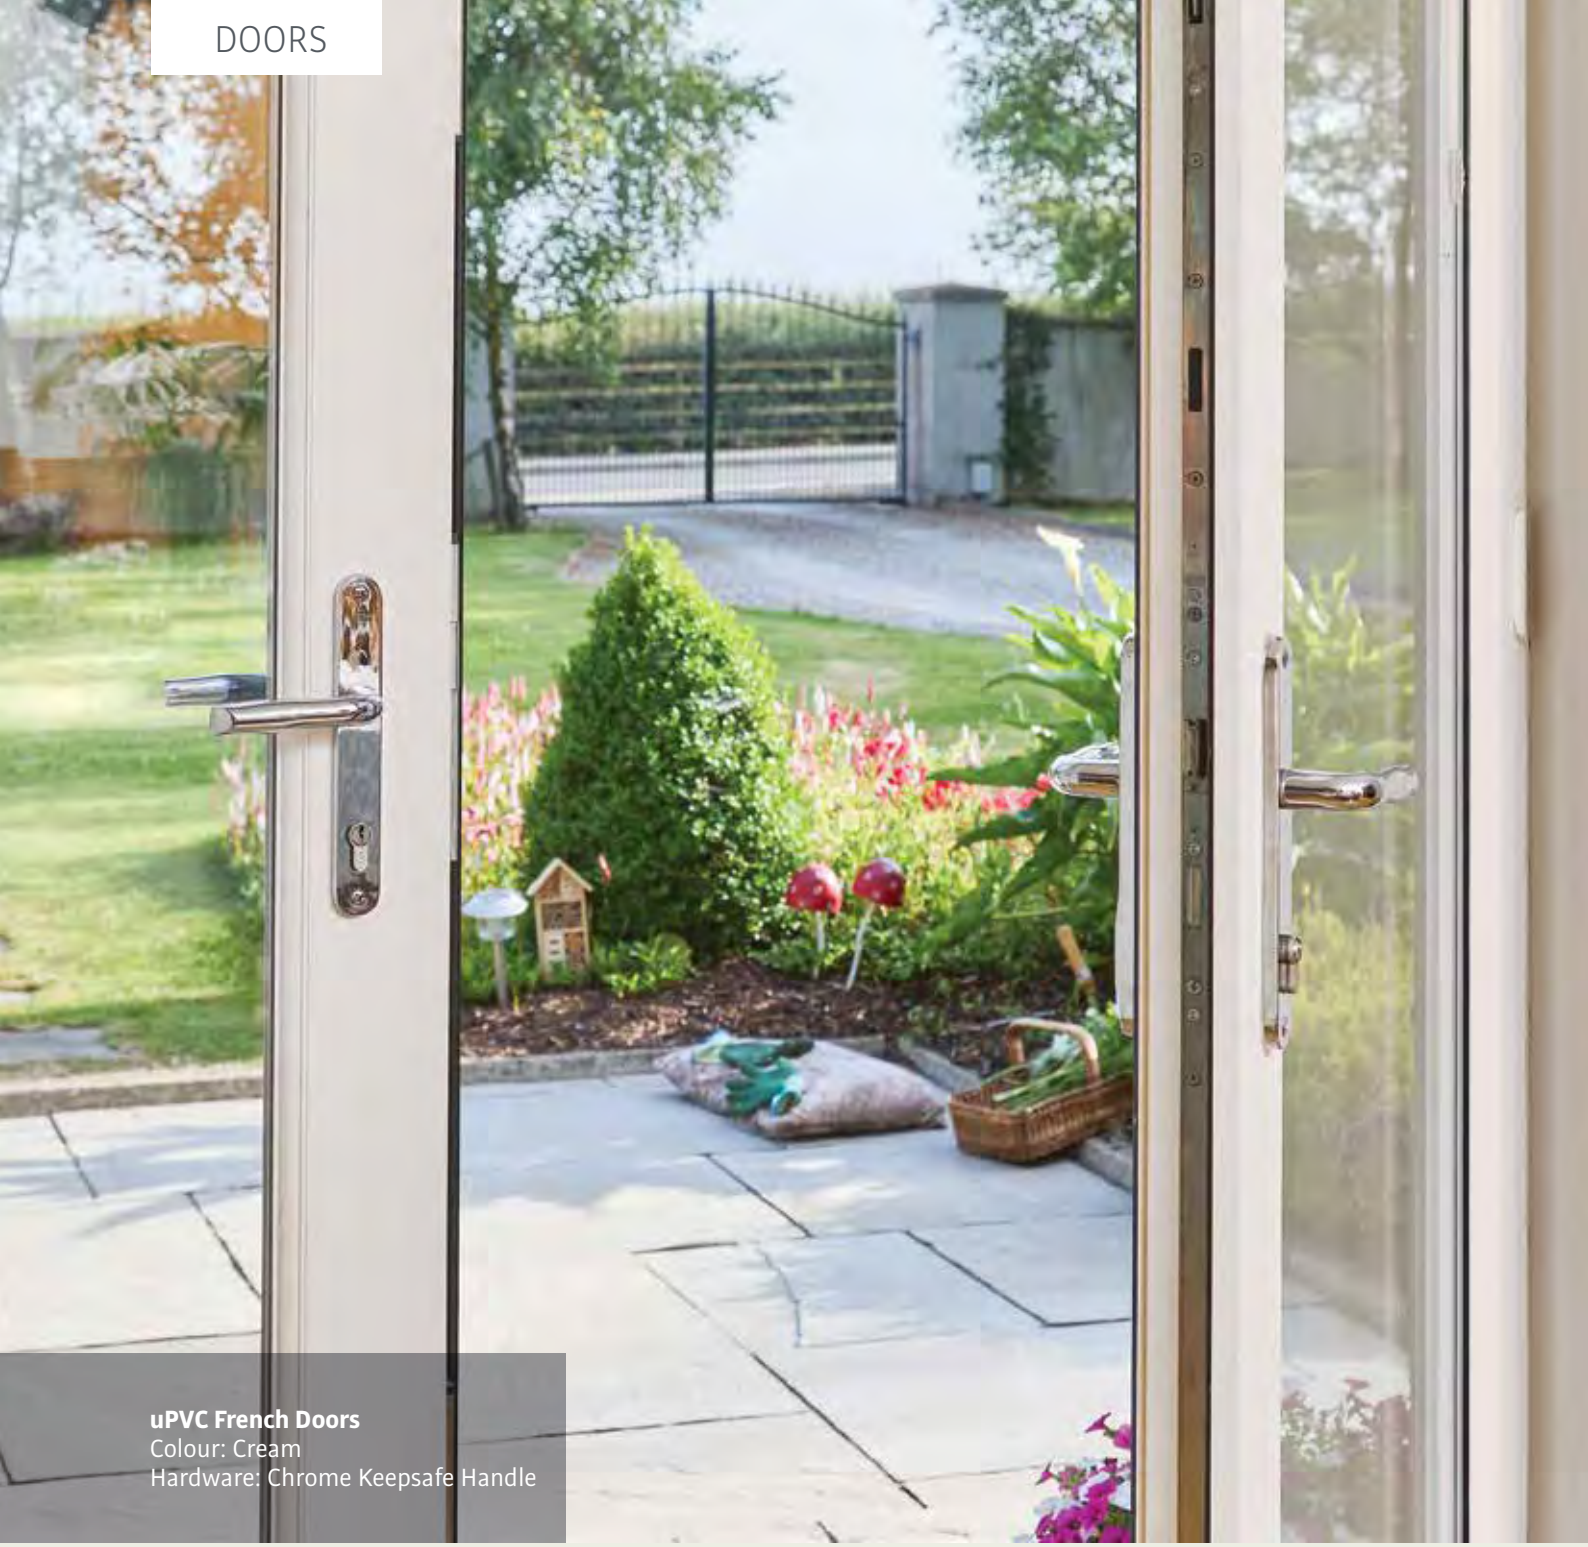
Residential Doors are available in a choice of 26 colours, with the option of dual colour, e.g. one colour external, another internal. (See Page 38). Handles and fittings are available in five colour options. (See page 58).

SECURITY

Senator Residential Doors are constructed with high security, multi-point locking mechanisms, cylinders and handles as well as thermally toughened safety glass (EN 12150). They are glazed with beading on the inside to prevent glass removal from the outside.

GUARANTEE

All Senator Doors are backed by a 15 year guarantee*.



uPVC French Doors
Colour: Cream
Hardware: Chrome Keepsafe Handle

TOP TIPS

From our expert design consultant, Denise O'Connor

French doors are a timeless and elegant design feature that can add a touch of sophistication to any home. They are ideal for use in rooms where natural light and an open feel are desired. Their ability to create a seamless transition between indoor and outdoor spaces makes them the perfect choice for living or dining rooms. When choosing the right style, consider the architectural style of your home and opt for a design that complements it. It's essential to consider the doors' size and placement to ensure they work with the proportion of the room and tie in with other features, such as window positions and heights.

FRENCH DOORS

A Senator uPVC French Door is as practical as it is elegant. As well as giving you a bright and refreshing opening onto your garden or patio during the summer, your Senator uPVC French Door gives you maximum light during the winter, while minimising heat loss.

Available in a range of colours, fittings and finishes, your Senator uPVC French Doors are the safe, secure, stylish and durable way to protect your home.

APPEARANCE

Low-maintenance Ovolo bead profile with elegant, slimline frames.

ENERGY

Senator's thermally efficient, five chamber profile and high-performance seals reduce heat loss, contributing to an overall U-value as low as 1.1 W/m²K with triple-glazing.

GLAZING

Senator French Doors come with 28mm double-glazing as standard, with the option of upgrading to 28mm, 36mm or 40mm triple-glazing. Decorative glass and Georgian bar option available.

OPENING STYLE

You can choose to have your French Door open inward or outward. Senator also offers a low threshold option.

WHY NOT CUSTOMISE YOUR FRENCH DOOR?

- For style and convenience, opt for integrated, maintenance-free blinds. *(See page 56)*

COLOUR

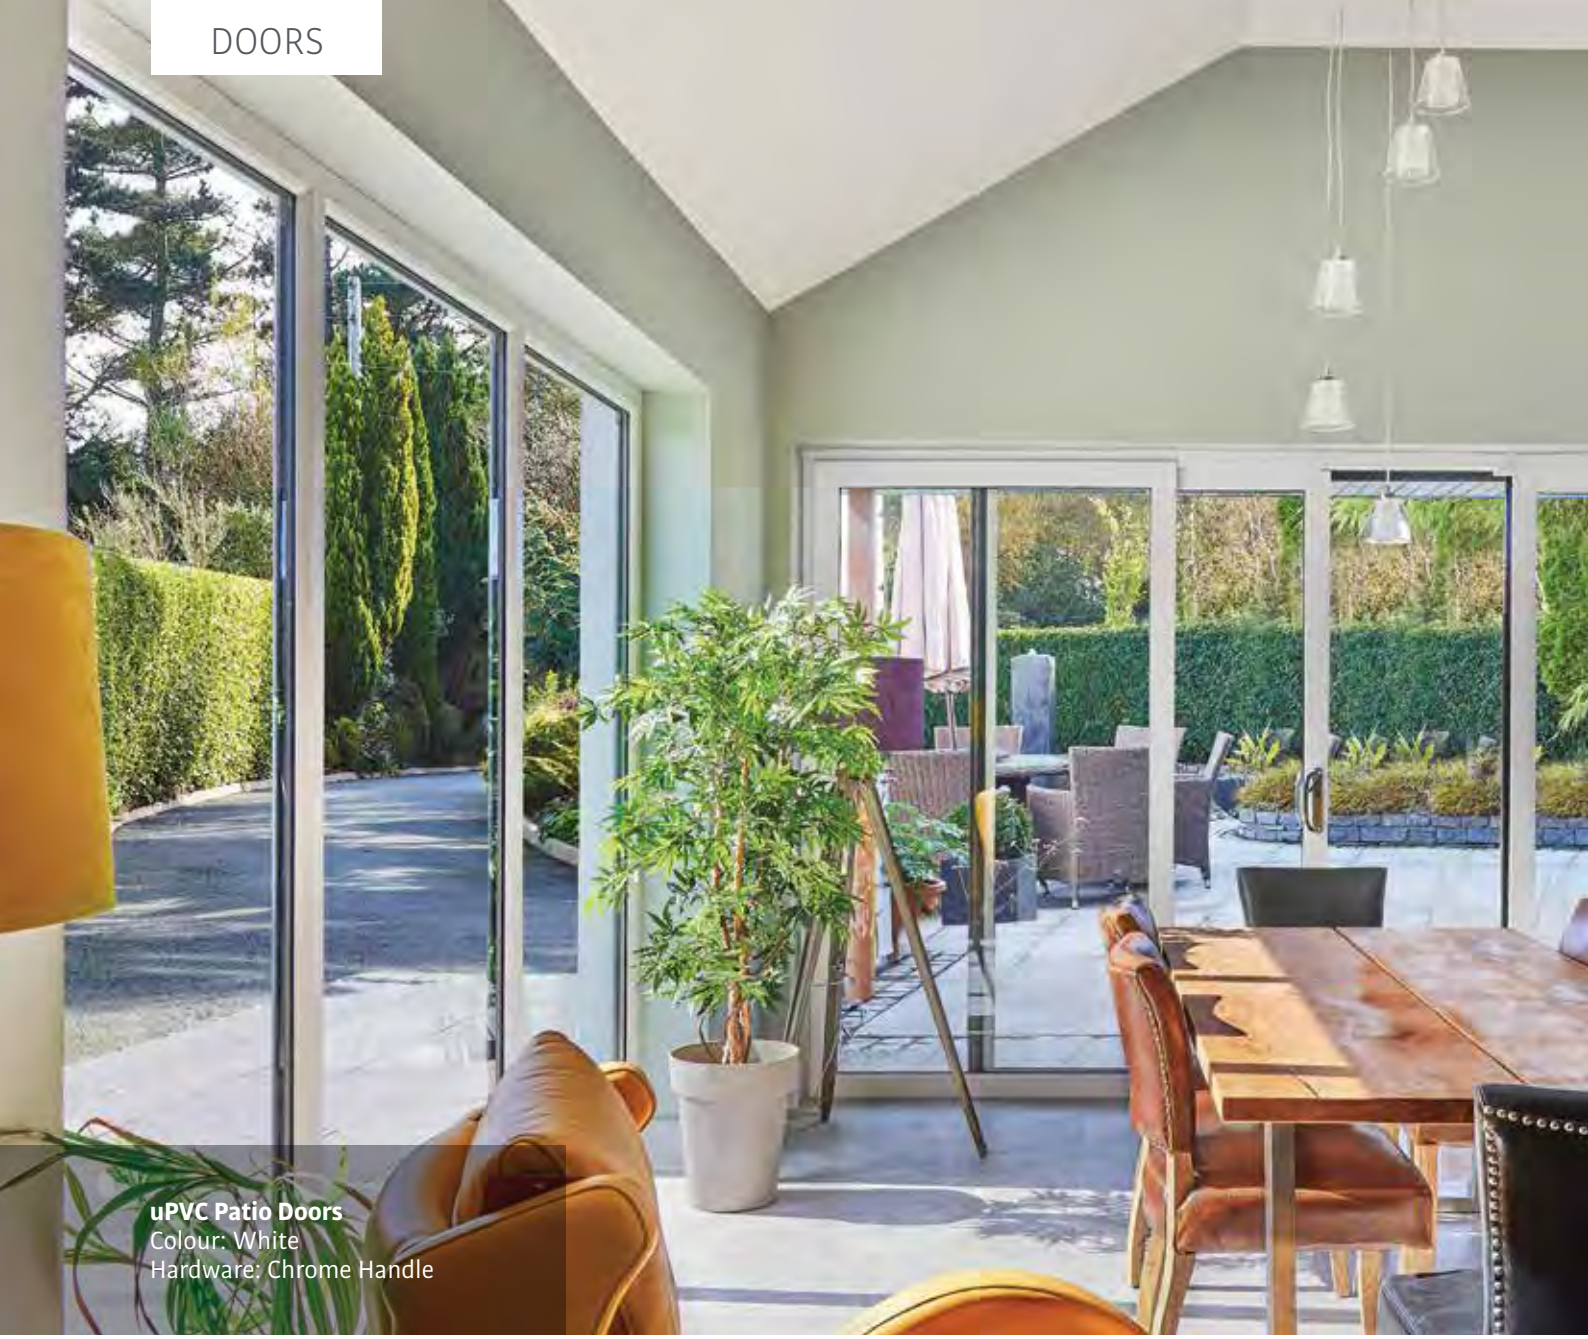
You can choose from a range of 26 colours, with the option to have different colours internally and externally (see page 38). You'll find handle colour options are shown on page 58.

SECURITY

Senator French Doors come with high security multi-point locking mechanisms, thoroughly tested and approved. The thermally toughened safety glass (EN 12150) is internally beaded to prevent it from being removed from the outside.

GUARANTEE

All Senator Doors are backed by a 15 year guarantee*.



uPVC Patio Doors
Colour: White
Hardware: Chrome Handle

PATIO DOORS

Senator uPVC Patio Doors are the elegant, efficient and secure way to keep your home cosy in winter, while making the most of summer sunlight and warmth. Sleek yet durable, Senator uPVC Patio Doors give you great views of your garden as well as optimum light, all year round. And the great thing about sliding doors is, you don't have to allow valuable living space for them to swing open.

WHY NOT CUSTOMISE YOUR PATIO DOOR?

- For style and convenience, opt for integrated, maintenance-free blinds. *(See page 56)*

APPEARANCE

Low-maintenance Ovolo bead profile with elegant, slimline frames.

ENERGY

Senator's thermally efficient, five chamber profile and high-performance seals reduce heat loss, contributing to an overall U-value as low as 1.2 W/m²K with triple-glazing.

GLAZING

Senator Patio Doors come with 28mm double-glazing as standard, with the option of upgrading to 28mm triple-glazing.

OPENING STYLE

Sliding doors can be installed with various configurations. A low threshold option is also available.

COLOUR

You can choose from a range of 26 colours, with the option to have different colours internally and externally (see page 38). You'll find handle colour options are shown on page 58.

SECURITY

Senator Patio Doors come with high security multi-point locking mechanisms, thoroughly tested and approved. The thermally toughened safety glass (EN 12150) is internally beaded to prevent it from being removed from the outside.

GUARANTEE

All Senator Doors are backed by a 15 year guarantee*.

TOP TIPS

From our expert design consultant, Denise O'Connor

uPVC patio doors are a versatile design feature that can add a modern and stylish touch to any home. They are ideal for connecting indoor and outdoor spaces and perfect for sunrooms, open-plan living spaces or dining rooms. One of the key benefits of uPVC patio doors is the wide range of design options available. When selecting the right style, consider the overall look and feel you want to achieve, and choose a design that complements your home's decor. Additionally, consider the placement of the doors to maximise natural light and views.

26 ELEGANT COLOURS TO CHOOSE FROM

— Inside and outside, in the combination of your choice.

Whatever type of house you live in, whether you live in the city, on a mountainside or on the coast, there's a colour and finish to suit the location and style of your home. You can choose between 26 elegant colours, including smooth and woodgrain finishes. And you can mix and match, one colour on the outside and another on the inside. You'll find which colours and finishes are available for each window or door style listed on the individual product pages.

Whilst every effort has been made to ensure the accuracy of the information and material contained in this brochure, the colours and finishes shown are indicative only and due to limitations in the printing process, actual colours may vary based on whether you are viewing the brochure on screen or in printed form. We would advise that the best way to experience the Senator Windows' colour range is to visit one of our showrooms. If you are not in a position to attend our showrooms, please contact one of our sales advisors and they will arrange an appointment with you to discuss the Senator Windows' colour options at a time and location suitable to you. Whilst every effort is made to keep Senator Windows brochures, website and publicity materials up-to-date, sometimes changes are made for technical or other reasons. We therefore reserve the right, at our sole discretion, to change, modify or alter our products and information at any time as new techniques, materials and systems dictate. The images and data shown in this brochure are for illustration purposes only and are not binding in detail, colour or specification. Participants received a payment for their time in contributing to this brochure.

TOP TIPS

From our expert design consultant, Denise O'Connor

Choosing the right colour for your uPVC windows and doors is essential to creating a cohesive and visually appealing home design. One of the first things to consider is the style and colour of your home's exterior. If you have a traditional-style home, consider a classic white or cream colour for your windows and doors. For a more contemporary home, you might opt for a darker shade, such as grey or black. When it comes to the interior colour, consider the overall colour scheme of your room. If you have a lot of neutral tones, adding a pop of colour with your windows and doors can add visual interest. Alternatively, you might opt for a colour that complements the colour of your walls or flooring.

Finally, to ensure your choice is timeless, choose a classic shade that won't go out of style. Neutral colours are always a safe choice, as they can be easily paired with other colours and design styles. Ultimately, choosing the right colour for your uPVC windows and doors comes down to personal preference and the overall design aesthetic you want to achieve.

CONSERVING ENERGY, SAVING MONEY

At Senator Windows we work very hard to bring you the most energy efficient products, for the sake of the environment, your comfort and your wallet. Senator's range of uPVC Windows and Doors is designed to provide the ideal combination of style, energy-efficiency and security. The range offers homeowners a comprehensive choice of glazing options to suit all kinds of homes, from traditional, to modern, whether it's window and door replacements, or new-builds and extensions.

The energy-efficient double or triple-glazing used in today's windows and doors differs from traditional single or old double glazing. Today, Senator uses Low-Iron/Low-E glass, warm edge spacer bars and fills the space between the panes with gas, which minimizes loss of heat through the glass.

Updating your windows and doors to today's standards won't just make your home more stylish, it will make it a more comfortable – and economical – place to live and to entertain your friends.

WHAT MAKES SENATOR WINDOWS AND DOORS SO ENERGY EFFICIENT?

Energy performance for windows and doors is measured in U-values. A 'U-value' indicates the level of thermal transmittance, or heat loss, you can expect from your windows and doors. It's measured in W/m^2K, or watts per metre squared Kelvin and, put simply, the lower the U- value, the better your home is insulated. A lot of heat loss in your home is through inefficient windows and doors – not just through the glass, but also the frame.

The multiple chambers inside Senator frames act as a barrier, making it more difficult for heat inside your home to be transferred to the outside. The effect of these chambers is further improved by the spacer bar and your glazing choice – double or triple – with a gas barrier between the panes.

Before settling on the material, colour and style of your windows and doors, it's worth taking a bit of time to decide what type of glazing you want in the various parts of your house.

While the emphasis is on preventing draughts and containing heat inside the house, it's also important to remember that sunlight is a source of natural, free energy. For example, north-facing areas may benefit from triple-glazing because there is the least amount of solar gain but there are a number of factors to take into consideration before you make your choice of glazing. Managing the glazing options throughout your home will ensure you get the most benefit from the sun's warmth, reducing heat loss – and bills.

The Senator range of uPVC windows and doors has excellent U-values, with window U-values as low as 0.71 W/m^2K with triple-glazing. Your Senator dealer can advise you and help you make the optimum choices for every room in your home.

> "Low-E glass" is fitted as standard on all Senator uPVC products where appropriate. It has a special coating to prevent loss of heat through the glass.

TIPS

FACTORS TO CONSIDER WHEN DECIDING BETWEEN DOUBLE AND TRIPLE-GLAZING

From our expert design consultant,
Denise O'Connor

Upgrading to energy-efficient windows and doors can improve your home's comfort and help reduce heating bills. But with so many options available, it can be hard to decide which type of glazing to choose. Here are some factors to consider when deciding between double and triple-glazing.

WHAT'S THE DIFFERENCE BETWEEN DOUBLE & TRIPLE-GLAZING?

The number of panes of glass is the main difference between triple and double-glazing. Triple-glazed windows have three panes, while double-glazed windows have two. The gap between each pane is filled with insulating gas, reducing the heat that can escape from your home. Triple-glazing offers better thermal efficiency, with significant energy savings compared to double-glazing.

WHAT IS THE ORIENTATION OF YOUR ROOMS?

Upgrading to double-glazing may be sufficient if your rooms face south since they receive natural solar gain. For all other facades, triple-glazing is preferable, especially for colder environments and exposed sites. Triple-glazed windows are thicker and heavier, making them more durable than double-glazing.

WHAT ARE THE COST CONSIDERATIONS?

Triple-glazing is more expensive than double-glazing, but the energy savings can offset the additional upfront cost over time. If your budget is restricted, consider installing triple-glazing on the north and east elevations with little or no solar gain and installing double-glazing throughout the rest of the house.

IS NOISE REDUCTION IMPORTANT TO YOU?

Replacing your windows with double or triple-glazing can significantly reduce noise pollution. Double-glazed laminated glass can reduce noise by up to 37 dB, while triple-glazed laminated glass can reduce noise by up to 40 dB. If you live in a noisy area or on a busy road, laminated glazed windows may be a great option.

Overall, upgrading to triple-glazing offers better energy efficiency and more significant savings on heating bills. Consider the orientation of your rooms, budget, and noise reduction needs when deciding which type of glazing to choose.

Triple-Glazing

uPVC Casement Window cross section with triple-glazing

Double-Glazing

uPVC Casement Window cross section with double-glazing

SEE THE LIGHT

Whatever the space, style or function, we have the glass.

BESPOKE DECORATIVE GLASS

If you are looking for something a little different, why not create an original design to enhance the appearance of your Senator windows and doors. There are a range of decorative glass designs and bevelled effects to choose from or, if you have an idea of your own, just talk to us.

SIDE LIGHTS AND FAN LIGHTS

uPVC Doors can be supplied complete with side lights and fan lights to enhance the overall appearance of your home. Side lights and fan lights will be glazed to match the rest of your door, whether it's double or triple-glazed.

NOISE CONTROL

You can opt for glass with noise control to reduce the level of external noise entering your home.

SOLAR CONTROL

If there are areas in your home that are particularly prone to sunlight, solar control glass will reduce the risk of overheating in the summer.

OBSCURE GLASS

Available in a variety of attractive patterns, obscure backing glass gives you both privacy and beauty, while still allowing light into your home.

THERMALLY TOUGHENED SAFETY GLASS

Thermally toughened safety glass (EN 12150) is fitted as standard where required. Toughened glass is up to five times stronger than ordinary glass of the same thickness.

WINDOW SECURITY

An eye for style, a sense of safety.

Your home is your castle. You want to be sure that you, your family and your treasured possessions are kept safe from intruders. The frames and hardware you choose for your windows and doors will make a big difference to your security, while adding to the style of your home. At Senator Windows, we take security very seriously, using only the highest quality, secure locking mechanisms on all of our products. Just some of the ways that we protect your home ...

SENATOR WINDOWS FEATURES:

- All Senator Windows have high security locking mechanisms, made with the most dependable, high quality materials.
- Senator's uPVC windows are all internally glazed to prevent glass removal from the outside, for maximum security.
- For added safety, toughened safety glass is used, as standard, in windows that are less than 800mm from floor level.
- Casement, French, Passive & High Performance Windows have push-button handles which click shut, for added security.
- Senator's Casement and French Windows are designed to accommodate high-security shootbolt locking mechanisms. The shootbolt's additional locking points, at the top and bottom of the casement, give it added strength, making it even more secure and reliable. *(See Page 55)*

PUSH HANDLES:

In order to open a window with a push handle, you have to press the button before turning the handle. This means you know the window is closed when the handle clicks shut.

BEADING:

Beading is what holds the pane of glass in the frame. At Senator, we place all beading on the inside of our window frames which means nobody can remove the glass from the outside, without breaking it and making a noise or setting off an alarm.

DOOR SECURITY
Built for peace of mind

At Senator Windows, our doors are among the most secure on the market and have passed the rigorous PAS 23/24 testing.

SENATOR DOORS, SECURITY FEATURES:

- Senator doors come with high security multi-point locking mechanisms.
- Internal beading prevents intruders from removing glass from the outside.
- Doors are glazed with thermally toughened safety glass (EN 12150), which is up to five times stronger than ordinary glass of the same thickness.
- Optional security features are available, depending on the door you choose. You'll find details for these on page 60.
- With Senator doors installed in your home you can rest assured, knowing your belongings are safe. All our doors are totally secure and come with a 15 year guarantee*.

IF VISIBLE DETERRENTS DON'T PUT INTRUDERS OFF THE HIDDEN, PATENTED INNOVATIONS WILL!

Senator uPVC Residential Doors and French Doors come with 'Keepsafe' handles as standard. Keepsafe door handles comply with – and exceed – the most recent security performance standards. Their advanced security features block even the latest methods of forced entry, as a well as containing additional security features that put them ahead of the smartest of intruder.

Keepsafe handle

SECURED BY DESIGN
The logo acts as a visible deterrent to intruders.

TESTED
The handle has been tested to 200,000 cycles, to ensure operational reliability.

ANTI-GRIP

The anti-grip chamfered backplate stops intruders from grabbing the unit with a vice grip or wrench.

CYLINDER DE-PLUGGING

An integral anti-plug disc, captive within the backplate, locates directly over the cylinder face to shield it from attack.

ANTI-DRILL
If attacked with a drill, rotating disks will simply spin preventing the drill bit from making any impression.

ANTI-SNAP
The integrated cylinder guard, visible within the raised backplate design, encases the cylinder to protect it from attack.

STEEL REINFORCEMENT TECHNOLOGY
The backplate within the fixture helps stop burglars from 'jemmying', or levering off, the door handle, thus stopping one of the more common ways of gaining entry.

FINISHING TOUCHES FOR YOUR WINDOWS

Personal taste, bespoke finish

Designed for both style and function, Senator's range of handles, restrictors and accessories are all stylish, ergonomic and highly durable. Take a look at the choices on offer and see what fits best with the mood and tone you're looking for in your home.

INTEGRATED, MAINTENANCE-FREE BLINDS

ScreenLine® Integrated Blinds offer a great many benefits. To begin with, they offer the privacy, shade and protection from sunlight you expect of a quality blind. The difference is the blind is sandwiched between two panes of glass, protecting it from dust and weather, and making it entirely maintenance-free. See page 56 for more details.

EASY-CLEAN 'EGRESS' HINGE

The easy-clean 'egress' hinge has two advantages: it facilitates easy and safe cleaning, and it allows the window to be used as an emergency exit. In the 'egress' position it becomes an exit then, when the hinge is released, the sash/opening can be moved into the easy-clean position. When you're finished cleaning, simply close the sash/opening and the hinge automatically resets.

CHILD-PROOF SAFETY CATCH

Senator uPVC Casement and French Windows can be fitted with a child-proof safety catch if desired. This safety catch allows you to open the window wide enough for ventilation but not wide enough to compromise security or child safety. In case of emergency, restrictors can be released as a means of escape. And, as the restrictor is fitted between the sash and frame, there are no unsightly attachments visible on the main surfaces of the window.

DECORATIVE SASH HORNS

Decorative sash horns are an optional, decorative addition to your casement windows. Sash horns give your window the character of traditional styling, alongside all the benefits of a modern, energy efficient glazing.

CREATING ARCHES AND ANGLES

The skilled team at Senator's Wexford manufacturing facility can create window shapes to your exact requirements, adding style and efficiency to awkward or unusual shaped spaces, like arches, circles and angles.

GEORGIAN BARS

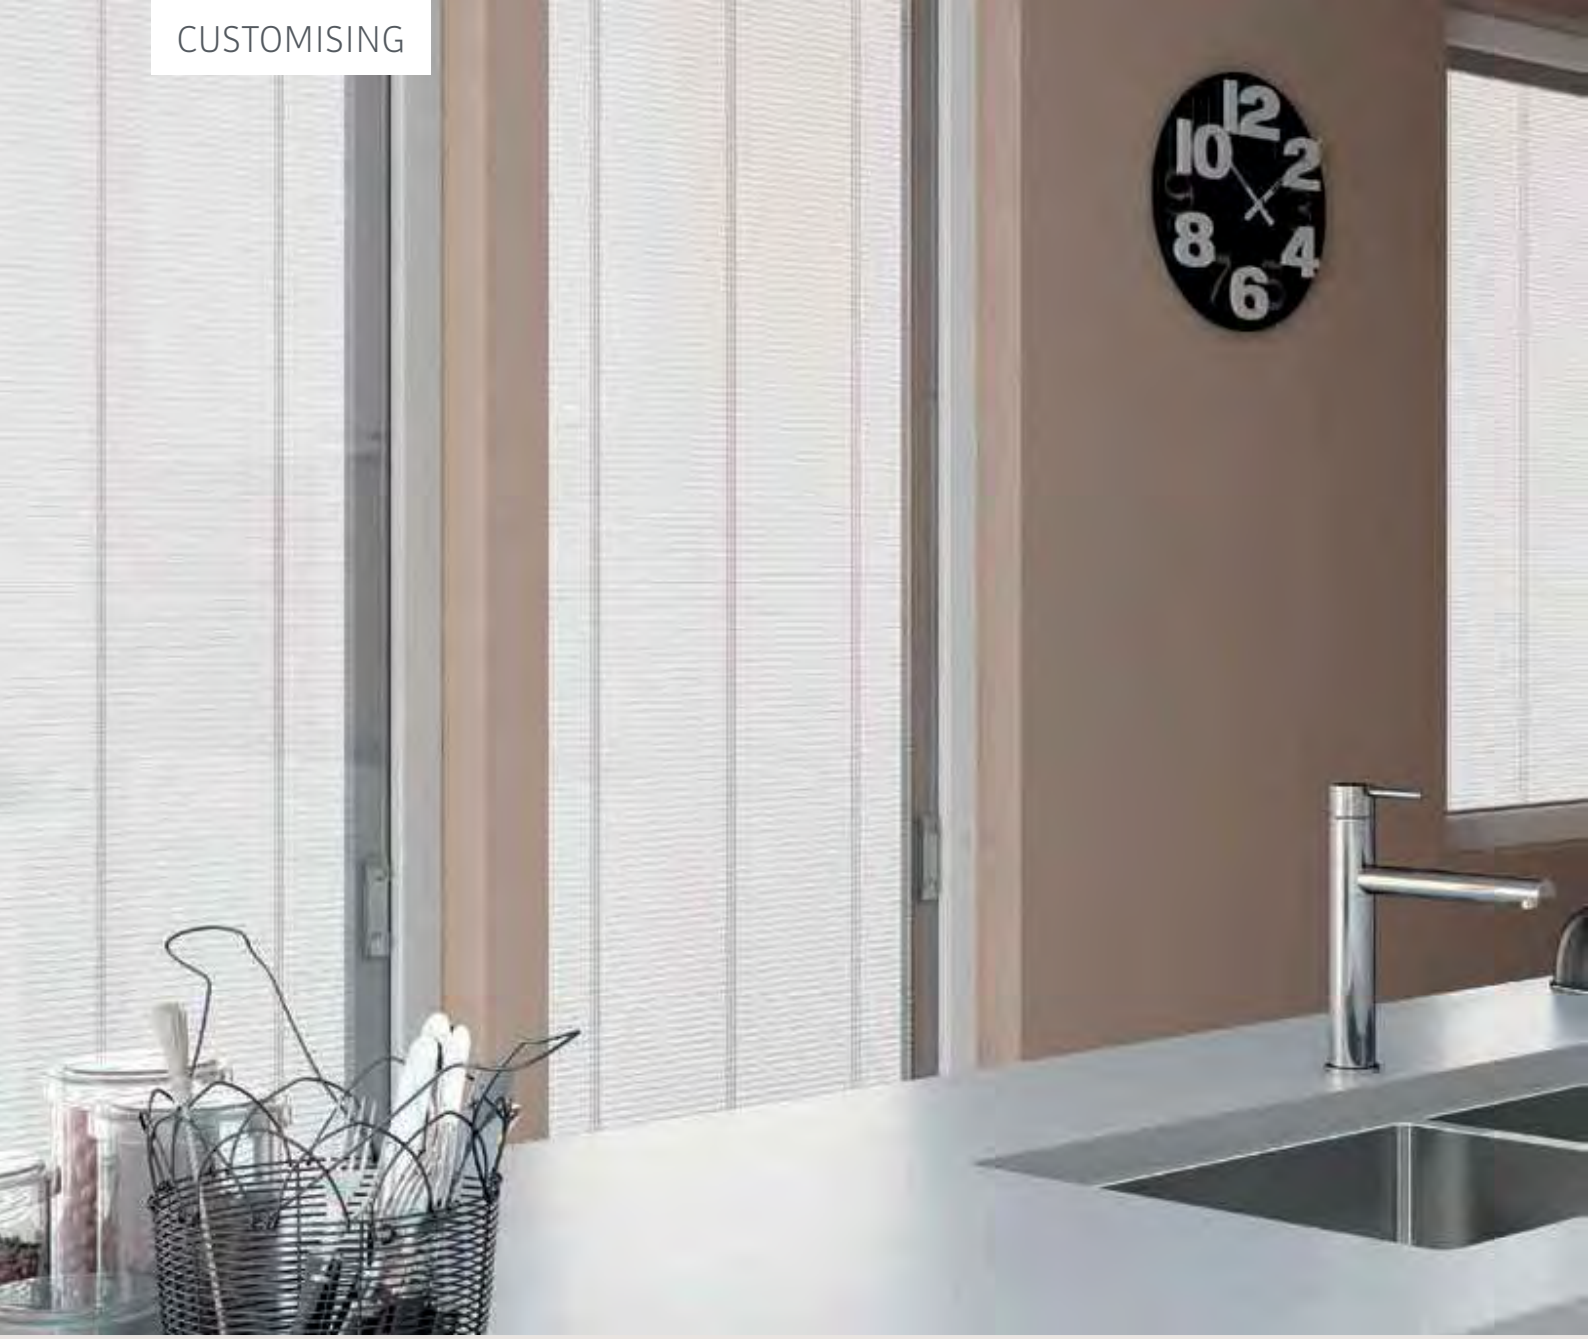
Georgian bars can be added to windows to achieve a traditional Georgian design. They can be stuck onto the surface of the pane, or they can be enclosed between the two layers of glazing, sealed in for ease of cleaning. Using the same colour as the frame, they are applied vertically and horizontally to form a grid pattern.

CHILD-PROOF RESTRICTOR

The Senator uPVC Vertical Sliding Sash Window can be fitted with Angel Ventlock® restrictors, if specified. The restrictor allows you to open the window wide enough for ventilation but not wide enough to compromise security or child safety. In case of emergency, restrictors can be released as a means of escape.

SHOOTBOLT LOCKING MECHANISM

All Senator products are designed and manufactured with safety, durability, efficiency and security in mind. In some situations, however, you may want additional peace of mind. Senator uPVC Casement and French Windows are designed to accommodate a high-security shootbolt locking mechanisms. The shootbolt's additional locking points, at the top and bottom of the casement, give it added strength, making it even more secure and reliable.



INTEGRATED BLINDS

Perfect performance.
Zero maintenance.

ScreenLine® Integrated Blinds offer a great many benefits. To begin with, they offer the privacy, shade and protection from sunlight that you expect of a quality blind. The difference is that the blind is sandwiched between two panes of glass, protecting it from dust and weather, making it entirely maintenance-free. Excellent light and solar control characteristics mean you can vary the angle of your blinds as you want.

The ScreenLine® Integrated Blinds System can be applied to uPVC Casement Windows, French Windows, Passive & High Performance Windows, Tilt & Turn Windows as well as uPVC Residential Doors, French Doors and Patio Doors. From manual to motorised systems we have the integral blind solution for you.

INTEGRATED BLINDS

The benefits are clear.

CLEAN FOR LIFE

ScreenLine® integrated blinds are completely sealed within a double glazed unit. No air can get in or out, which means no dust can either. As a result, they are clean for life, saving you time, money and hassle – for years to come.

NO RISK OF DAMAGE

As they are sealed inside the double-glazed unit, ScreenLine® blinds cannot be twisted, torn, scratched or stained - unlike traditional blinds which are exposed to all the day-to-day hazards of life in the home.

LONG LIFE

All ScreenLine® blinds are produced and tested to the highest standards so you can be sure they are made to last.

MAINTENANCE FREE

One of the major benefits of ScreenLine® integrated blinds is they are maintenance free. Like all our external components they are made to the highest standards, using the most durable components.

PRIVACY

All ScreenLine® integrated blinds are close-fitted to ensure absolute privacy. We also offer an internal 'black out blind' system if required.

EXCELLENT LIGHT & SOLAR CONTROL PROPERTIES

Senator's high quality blind systems greatly improve performance of double glazed units through their excellent solar and light control properties.

FINISHING TOUCHES FOR YOUR DOORS

Your home. Your taste. Your welcome.

Senator offers a comprehensive range door furniture, in a variety of styles and finishes, each piece ergonomic, durable and ready to give your house the individuality you desire. Take a look through the options and select the combination of features that looks and functions best in your home.

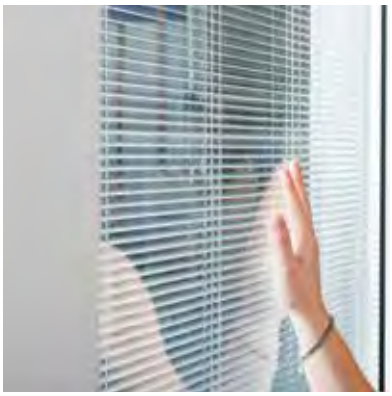
FINISHING TOUCHES FOR YOUR DOORS

The difference is in the detail.

When you see a home fitted with Senator Doors, the first thing you notice is the homeowner's choice of style, colour and finish. What you don't see is their selections from the range of optional features at work beneath that sleek, elegant surface. Simply choose the combination of features that fit your vision for your home, and select the functions that deliver your choice of comfort, convenience, security and safety.



INTEGRATED, MAINTENANCE-FREE BLINDS

ScreenLine® Integrated Blinds offer a great many benefits. To begin with, they offer the privacy, shade and protection from sunlight you expect of a quality blind. The difference is the blind is sandwiched between two panes of glass, protecting it from dust and weather, and making it entirely maintenance-free. Screenline®'s excellent light and solar control capabilities allow you to vary the angle of your blinds and control the light as you want. For more detail see page 56.

SAFE T CATCH

The Senator Windows 'Safe T Catch' is the ultimate in protection against uninvited guests. The rigid bar within the Safe T Catch is much stronger than a chain, so it puts up greater resistance against forced entry. Also, it's more visually attractive because, unlike a chain, it remains hidden from view until it's needed.

THUMBTURN LOCKING

Senator's 'Thumbturn' option allows you to lock your door securely from the inside, without a key. This gives you all the safety, security and peace of mind you want from a Residential Door, with the added safety of being able to get out easily, without having to look for your key.

TOP TIPS

From our expert design consultant, Denise O'Connor

Selecting the right security features for your uPVC windows and doors is crucial to keeping your home safe and secure. Speaking to the sales representative for advice on the best products to suit your needs is important. Consider installing reinforced or laminated glass for added strength and protection for windows or doors with glazed panels. Multi-point locking can also significantly increase the security of your windows and doors. Child locks and safety catches can also be added to ensure that your windows and doors are safe for children to use. Finally, regularly maintain your locks and other security features to ensure they work correctly and replace them if worn or damaged. Choosing high-quality security features can help keep your home and family safe from intruders.

GET A HANDLE ON OUR RANGE OF WINDOWS AND DOORS WITH A VISIT TO A SENATOR SHOWROOM

The best way to experience the Senator Window's uPVC Window and Door range is to visit one of our showrooms. It's a great opportunity to see the range of products, handles and knockers first hand, to experience their movement and feel the texture of their finishes.
